

INTRALON BICYCLE ASSEMBLY INSTRUCTION MANUAL

Thank You for Choosing INTRALON

We appreciate your purchase of an INTRALON bicycle. This manual provides you with detailed, step-by-step instructions to assemble your bike correctly and safely. Please read this guide thoroughly before beginning assembly.

Safety First

- Always wear appropriate safety gear when assembling or riding your bicycle.
- Ensure all bolts and nuts are tightened to the recommended torque settings.
- Check all moving parts for correct alignment before first use.
- If in doubt, consult a qualified bicycle technician.

Package includes:

Assembly Steps:

1. Install the Handlebars

- Align the stem with the front wheel.
- Insert the handlebars into the stem and tighten the stem bolts evenly.
- Ensure the handlebars are centered and angled for a comfortable grip.

2. Attach the Front Wheel

- Position the fork dropouts over the axle of the front wheel.
- Tighten the quick-release skewer or axle nuts securely.
- Ensure the wheel spins freely and is centered in the fork.

3. Mount the Saddle / Bike Seat

- Insert the seat post into the seat tube.
- Adjust to your desired height and tighten the seat clamp bolt.
- Ensure the seat is leveled and secured.

4. Install the front cover during assembly to secure and conceal the bolts. This step ensures proper bolt retention and completes the bike's design appearance.

5. Final Safety Check

- Confirm that all bolts are tightened to the correct torque.
- Check tire pressure (see sidewall for PSI recommendations).
- Spin wheels and check for wobble or resist

Maintenance Requirements

Tighten all fasteners and check alignment monthly. Store your bicycle in a dry and secure place.
